Description/Map:

The FNST along the Kissimmee River is currently closed between the northern boundary of Kissimmee Prairie Preserve State Park and south of the S-65A lock structure.

The levee just south of the S-65A lock structure along the eastern side of the Kissimmee River has been breached due to the recent rains. SFWMD is currently evaluating the situation and will be making repairs to get the trail re-opened as soon as possible.
