Permanent Change: No

UPDATE on the Suwannee River flooding:

As of today, 12/26/18 the Suwannee River at White Springs, FL is at 80.5 feet. The trail will be completely underwater in many places including many of our designated campsites. Check the SRWMD website here <http://www.mysuwanneeriver.org/realtime/river-levels.php> for real time updates. Any time the river is above 60 feet some low spots on the river will be wet. Plan on avoiding this section of trail until river levels drop significantly.
